EDUCATION

Pursuing BCA From IGNOU

SKILLS

- JavaScript (Backend)
- Node.js
- · Express.js
- HTML5 (Frontend)
- CSS3 (Frontend)
- Bootstrap
- WordPress
- Tailwind CSS
- React.js (Frontend)
- MongoDB (Backend)
- SQL
- REST API
- MERN Stack (ReactJS, NodeJS, ExpressJS, MongoDB)
- Backend Development
- Frontend Development
- Web Development
- Responsive Web Design
- Version Control (e.g., Git)
- Database Management
- API Integration
- Agile Development Methodologies
- Problem-solving
- Communication Skills

PROFILE

As a BCA student at IGNOU, I bring a blend of theoretical knowledge and practical experience gained through internships at iMeet Technology (3 months) and Echo (5 months). Proficient in JavaScript, Node.js, Express.js for backend development and adept at HTML5, CSS3, Bootstrap, WordPress, and Tailwind CSS for frontend. Skilled in React.js and experienced in database management with MongoDB and SQL. Proven abilities in API integration, agile methodologies, and effective problem-solving, complemented by strong communication skills.

EXPERIENCE

Internship

iMeet Technology | 3 months

Roles & Responsibilities -

- Assisted in researching new technologies, trends, and market developments relevant to iMeet Technology's products and services.
- Provided support to ongoing projects by conducting data analysis, creating reports, and contributing to project planning and execution.
- Participated in testing software applications, identifying bugs or errors, and providing feedback for improvement.
- Collaborated with team members on various projects, contributing ideas, sharing insights, and working together to achieve project goals.
- Actively engaged in learning opportunities provided during the internship, gaining hands-on experience in various aspects of technology development and project management.

Internship

Echo | 5 months

Roles & Responsibilities -

- Leveraged React and Material-UI to develop the frontend of an SaaS product, contributing to its user interface and user experience design.
- Demonstrated proficiency in React, Material-UI, Highcharts, and Redux, utilizing these technologies to develop and enhance software solutions.
- Worked collaboratively with the development team to integrate frontend components seamlessly with backend functionality, ensuring a cohesive and responsive user experience.
- Identified and resolved frontend development issues, troubleshooting bugs and implementing solutions to improve product functionality and performance.
- Actively engaged in a 7-month internship focused on frontend development, continuously learning and applying new skills in React, Material-UI, and other technologies to contribute effectively to project objectives.

PROJECTS

- 1. Movie Data App (Feb 2023 Mar 2023):
 - Description: Implemented a movie show data-display app using HTML, CSS, ReactJS, and TailwindCSS. Utilized a movie data API for displaying relevant information. Developed a booking feature, storing data in local storage.
 - o Technologies Used: HTML, CSS, ReactJS, TailwindCSS, movie data API.
- 2. Todo App (Mar 2023):
 - Description: Developed a ToDo App using React, Tailwind CSS, Firebase Auth, Context API, and Firebase Store. Enabled
 Create, Update, and Delete ToDos functionality. Implemented Firebase Auth for user authentication and authorization.
 - o Technologies Used: React, Tailwind CSS, Firebase Auth, Context API, Firebase Store.
- 3. News Website (Feb 2023):
 - Description: Developed a News Website using React, News API, HTML, and TailwindCSS. Optimized the website for mobile responsiveness.
 - o Technologies Used: React, News API, HTML, TailwindCSS.
- 4. Tic-Tac-Toe (Feb 2023):
 - o Description: Developed a Tic-Tac-Toe game using HTML, CSS, and JavaScript with a glassmorphism effect. Enabled offline playability.
 - o Technologies Used: HTML, CSS, JavaScript.

These projects showcase a diverse range of skills in web development, including frontend technologies like ReactJS, HTML, CSS, and the integration of APIs for fetching data. The use of Firebase for authentication and data storage adds backend functionality to your Todo App. Overall, it seems like you've gained experience in both frontend and backend development through these projects.

I do hereby declare that the particulars of information and facts stated here in above are true, correct and complete to the best of my knowledge and belief.
